

III. DEBT-NOTES, MEMORANDUMS AND RELATED RECORDS (54-78)

A. Debt-notes (54-64)

Debt-notes with their envelopes intact probably were never paid back by the debtor. Those whose broken envelope was not found in the archive may have been tablets that were “split” (*laṭāum*, see the note on AKT 6, 671:16), which means that upon payment the sealed envelope was broken and removed to deprive it of its legal value, while the creditor or debtor might preserve the tablet inside for his administration.

The debt-notes are presented here in chronological order, first those dated by year eponym, next two only dated by week eponym, and finally three undated *be'ulātu*-contracts. The memorandum *68 has been included here because its first part presents the full text of a debt-note. Several of the contracts are excerpted in memorandums from Elamma's archive, see the listing in the comments on *70.

54. Kt 91/k 393 (1-247-91)

Unopened black case, coarse writing, which contains a contract for a debt of 40 shekels of silver owed by Aššur-bāni, dated to the year REL 67. The interest is 33⅓ % (no period mentioned), and the text is unique in stating for how much (capital + interest) the creditor will sue him if he defaults.

le.e	seal A		

Seals

seal A = CS 1163

III. DEBT-NOTES, MEMOS AND RELATED RECORDS (54-78)

seal B = CS 1164, fragmentary three-line inscription, with drill-holes in the first two lines of the inscription; still preserved: [.....]-x-x / [.....]-[*l*]*a*²-a / [.....]-GA

seal C = CS 1165, fragmentary two-line inscription: x x [.....] / DUMU² x [.....].

Lack of filiation of the two witnesses makes it difficult to identify them.

Notes

4. Another debt, 50 shekels of silver, of the same man is listed in *70:18f., where Elamma is the creditor.

5. See for this formula Landsberger 1964 and for some additional occurrences Donbaz 1988, 54-56, notably in Kt n/k 1857:9-13, in connection with a payment in two installments: "They will pay within 13 weeks; they will pay 2 minas 17 shekels *ana ettišu* and 2 minas 17 1/6 shekels *ana ettišuma*". With three installments and a debt of 30 shekels of gold in Kt 88/k 263:34-38 (Donbaz 2007, 145f.): "From month V of eponymy (REL) 76 the debtor will pay 10 shekels in month XI, 10 shekels *ana šaniuttim e-ti-šu*, and 10 shekels *ana šalšuttim e-ti-šu*", where *ettum* seems to be plural, referring to successive terms of six months. Note also Kt 86/k 163:5, a silver debt to be paid *ana ettišunu ina niggallim*, "at the term agreed by them(?), at the time of the harvest". But in AKT 3, 103:7, *ūmū ettum šakin*, "an agreed term has been set", and CCT 5, 44b:9-10, *ettum šaknam*, the word is in the singular.

7-8. This formulation of the interest clause is typical for early debt-notes and especially by small debts of less than 1 mina of silver.

9-10. *Še'ā'um* is construed with a personal accusative and the item one claims can be a second accusative (examples in CAD Š/II, 358, 3, a, e.g. *šaddu'itī kāram aše'e*), or be introduced by *ana* (pace CAD KÙ.B. *lā-qú-im* BIN 4, 79:18' is a stative D, not an infinitive, as shown by I. 14', *aššēr kaspum annium lā-qú-ū*). This is an unusual formulation for a debt-note and raises the question whether Hinnāya was indeed the (original) creditor. The mention in *70:18-19 of a comparable debt, of 50 shekels of silver, owed by the same debtor to Elamma suggests the possibility of a transfer of the claim and if so, it is further evidence of the business contacts between Elamma and Hinnāya.

13. Eponymy REL 67 is the earliest one recorded in the archive; another debt dated to this year is recorded in *74:15-19 // *75:9-11.

55. Kt 91/k 304 (1-161-91)

The tablet, whose reverse is not inscribed, records a silver debt of Idnāya, from eponymy year REL 82; its envelope is not preserved in the archive.

4	<i>ma-na 4 LÁ 1/6 GÍN</i>	4 minas 3 5/6 shekels
	KÙ.B. <i>ša-ru-pá-am</i>	of refined silver
	<i>i-še-er Id-na-a</i>	Ibnāya owes

	<i>Šu-ki-tim ù Ú-ra-a</i>	Šukutum and Urāya
	<i>1¼ GÍN i-na ITU.1.KAM</i>	he will add as interest
	<i>a-na ma-na-im</i>	1¼ shekel per mina
	<i>ú-ša-áb</i>	per month.
10	IGI <i>I-lá-áb-ra-at-ba-ni</i>	In the presence of Ilabrat-bāni,
i.e.	IGI <i>Ib-ni-lí</i>	of Ibni-ilī

III. DEBT-NOTES, MEMOS AND RELATED RECORDS (54-78)

Notes

6. The name of the first man is Šuk(k)utum, with vowel harmony, from Šuk(k)atum, a spelling occasionally attested, e.g. as name of the second year eponym in KEL G (Kt p/k 9, *Memorial Garelli* 125, note 4) and in CCT 1, 4:39, Šu-lštar s. *Šu-kā-tim* // *Šu-ki-tim* in AKT 3, 64:41.

7. The interest is a little less than normal, perhaps a favor to the debtor.

Comment

This debt-note is excerpted in the memoranda *74:6-10 and *75:5-6. The former adds its date, month IV of eponymy year REL 82, not mentioned on this tablet, but presumably on its now missing envelope. If not, one would have to assume that the writer could find out when these week eponyms were in office, probably on the basis of a list. The double week eponym is well attested elsewhere (see Kryszat 2004, 194), but only once with a date, month VIII of eponymy REL 79. Idnāya occurs as debtor of Elamma also in *70:29 (for 1½ mina of silver) and *119 records a settlement of accounts between him and Elamma. The background of such debts may have been some form of cooperation in a caravan, as attested in *5:3-7.

56. Kt 91/k 435 (1-288-91)

Tablet (without its envelope) recording a silver debt owed by Šumi-abiya to Elamma, dated to eponymy year REL 85. This debt might concern the “working capital” supplied to Šumi-abiya as “harnesser”, according to *37:31-32 (half of the 1 mina given to him and Uzua, no date), but only if he had subsequently defaulted and was obliged to accept this new contract, which now stipulated interest and a at a high rate of 40% per year.

$\frac{1}{2}$ ma-na KÙ.B	ša-ru-pá-am	$\frac{1}{2}$ mina of refined silver
i-še-er		Šumi-abiya

IGI En-um-A-šur		of Ennam-Aššur,
DUMU Puzur ₄ -A-šur		son of Puzur-Aššur.

Notes

7. The interest clause does not mention “per mina” and must refer to the amount of the debt.

9. The scribe already knew the name of the new year eponym REL 85 in month I, while the one of *68:5-7 during month III still referred to him as the successor of REL 84.

57. Kt 91/k 398 (1-251-91)

III. DEBT-NOTES, MEMOS AND RELATED RECORDS (54-78)

Unopened envelope with a contract dated to eponymy year REL 88 about a silver debt owed by Ilšu-rabi to Elamma, identified as a penalty for a theft imposed on him by the Kanesh colony.

 r.e. seal A

Seals

seal A = CS 804, also impressed as Kt n/k 1946D

seal B = CS 1174

seal C = CS 1175

seal D = CS 1176

Notes

5. This debt is presumably listed in the memo *70:27-28, where the amount of the debt is rounded off to 1 mina.

9-10. Signs damaged and missing due to a hole in the envelope and the readings ÁB and HU are uncertain; the alternative for HU is DA, which yields *Šu-d[a-a]*, eponym REL 82 (Šu-Suen, REL 104, is too late).

13-15. This identifies the debt as a fine imposed by the colony because of a theft committed against Elamma, which must have amounted to 20½ shekels. See for case of the “triple payment penalty” *OALP 260*. Note that “to steal” in OA can also refer to the unauthorized acquisition of assets belonging to somebody else, see the note on *109:8.

III. DEBT-NOTES, MEMOS AND RELATED RECORDS (54-78)

Unopened envelope (whose left side is damaged) with a debt-note for an amount of silver due by Abatanānum to Elamma, dated to eponymy year REL 89.

	DUMU <i>Ba-zi-a</i>	son of Baziya.
19	IGI <i>Im-dí-lim</i>	In the presence of Imdī-ilum,
u.e.	DUMU <i>Šu-Lá-ba-an</i>	son of Šu-Labān,
	IGI <i>E-me-me-i</i>	of Ememe'i,
l.e.e.	DUMU <i>A-zu-ta-a</i>	son of Azutaya.

Notes

21. This name is also spelled *E-me-me*, *I-me-me* and *E-e-me-me*. Most occurrences are of Ememe, father of Azutaya (also in *192:14 and VS 26, 102:20), and the/a son of Azutaya appears also in BIN 4, 28:14 (as witness). He or a namesake is attested as week-eponym, together with Aššur-nādā, during eponymy year REL 86, and together with Aššur-taklāku during eponymy years REL 90 and 96.

60. Kt 91/k 489A/B (1-342-91)

Fragmentary case (A) with a complete tablet (B) with a contract about a silver debt owed by Ištar-ilšū to Elamma's son Aššur-ṭāb, dated to eponymy year REL 90, when Elamma was still active. This debt-note is excerpted in *69:49-51. The tablet grants the creditor the right to collect the debt wherever he sees the debtor.

Translation

(The patronyms of the witnesses, the name of the debtor as sealer, missing on the tablet, and the addition in B-10-12 are in italics)

Case: “Seal of Dadiya, son of B[azaza]; seal of Iddin-abum, son of Iddin-Suen; seal of Ištar-ilšu, son of Azuzaya; seal of Aššur-šamšī, son of Ilī-tūram.⁶ 2/3 mina 5 shekels of refined silver Ištar-ilšu, son of [Azuzaya], owes to Aššur-ṭāb, son of E[lamma].¹⁰ From the week of Hurāšānum and Aššur-mālik, eponymy of Alī-ahum, son of [Inah-ilī], he will add 1 ½ shekel per mina as interest”. B: 10-12: “I will take the silver wherever I see him”.

Seals

seal A = CS 1220

seal B = CS 1221, with a one-line inscription: KIŠIB l-lí-iš-tá-k[i-il₅], but this name is neither that of the debtor nor that of one of the witnesses.

seal C = CS 1222

seal D = CS 1223, fragmentary two-line inscription: [l-lí-tù-r[a-am] / [DUMU A-šū]r-mu-ta-p[il^l], the name of the father of the third witness.

Notes

A:1. The restoration of the name in A:1 is based on Kt j/k 233:3 (from eponymy year 74).

B:4-6. The double week eponymy also occurs during month IV of eponymy year REL 92 (TC 1, 91) and month V of REL 95 (CCT 5, 21b) and it features with Aššur-mālik as the first name during this same month and year in Kt 89/k 303.

B:11-12. See for this clause and its variations the comments on AKT 5, 44:13'ff. The clause is always in the first person, as spoken by the creditor when the contract was made, and it is typical for non-standard clauses added to the formulary at the wish of the creditor. It allows the collection of the debt both in Assur and in Anatolia.

61. Kt 91/k 390 (1-244-91).

Unopened envelope with a debt-note for modest quantities of copper and silver due to Elamma by Puzur-Suen.

	seal A	
u.e.	seal A	
le.e	seal A	

Seals

seal A = CS 1156, carries a “pseudo-inscription”.

seal B = CS 1157, same seal impressed as ICK 1, 20E = Teissier no. 262.

seal C = CS 1158, part of an inscription, not deciphered.

The seals must belong to the debtor Puzur-Suen (no filiation) and the two witnesses, Šu-Bēlum and a man whose name is missing in line 2. He could be the owner of CS 1157, since the two other sealers do not feature among those of ICK 1, 20.

Notes

5, 12. The due dates, based on the agricultural season (see *OBO* 160/5, 240f.), are unusual among Assyrians.

6-7. Tappašatta is most probably identical to Hittite Tappasand/ta, possibly in the area north(-west) of Hattuš (see *Copper* 14, 44). This rare nisbe of copper also occurs in Kt n/k 1952:4 (Bayram, *ArAn* 3 [1997], 548f.). See for the equally rare *zaku’um*, “clean, pure”, used of copper *Copper* 36 (also in Kt n/k 1742:5, URUDU *za-ku-am*).

8-10. “The rule of the Durhumit colony” on default interest payable on copper debts is attested only here, but is understandable since the city was the main copper market (*Copper* 154f.), which must have entailed price-forming (cf. “copper according to the exchange rate [*mahīrum*] of Durhumit”, in Kt 91/k 181:16 and Kt n/k 661:7) and fixing the interest. We also meet interest “according to the rate of colony of Timilkiya” (Kt 87/k 256:6-8, courtesy of K. Hecker, for a silver debt of only 2 ½ shekels!). These rates must have been the usual ones of 30% per year, since this rate in Kt n/k 1952:12-15 is said to be “in conformity with the rule of the colony”.

11. The reason for the additional payment of 10 shekels of silver is not clear, but its value, roughly about 1/4 of that of the copper, suggests a form of interest.

15-16. This presumably means that the creditor can indemnify himself by taking other assets of the debtor.

III. DEBT-NOTES, MEMOS AND RELATED RECORDS (54-78)

62. Kt 91/k 333 (1-190-91)

Tablet recording an undated small silver debt owed to Elamma by Ikūn-Mīšar, who will pay back when he return from a trip to Assur, presumably from the profit he will make by selling the merchandise bought there.

	8 GÍN KÙ.B. <i>ša-ru-/<pá>-am</i>	8 shekels of refined silver
	<i>i-še-er</i>	Ikūn-Mīšar
	<i>l-ku-mi-šar</i>	owes to
	<i>E-lá-ma i-šu</i>	Elamma.
5	<i>iš-tù a-lim^{ki}</i>	He will

rev.	<i>i-ša-qal</i>	from the City.
	IGI <i>Šu-lštar</i>	In the presence of Šu-lštar.

Comment

This debt is also excerpted in the memo *74:13f.//*75:8f. and quoted in full in the memorandum * 69:24-28, where the text was copied from the envelope of the tablet (which is not preserved), because it starts by mentioning the seal impressions of the witness, Šu-lštar, son of Ennum-Aššur, and of the debtor, Ikūn-Mīšar, the son of Ilī-dān. The mention of Elamma as creditor in our text proves that the memoranda *70, *74 and *75, which do not name him as such, record debt claims of him.

63. Kt 91/k 400 (1-254-91)

Undated tablet recording a small silver debt owed by Ilī-dān to Elamma. The tablet is a copy made from the envelope of the debt-note, since it starts by mentioning the sealings.

Comment

The man who owes this small debt occurs only here and is also obscure outside the archive.

64. Kt 91/k 477A/B (1-330-91)

This envelope (A) and the tablet it contained (B) record a silver debt owed by Galdaya, his “harnesser”, to Elamma, dated to eponymy year REL 76. The debt results from a settlement of accounts before witnesses, in which travel expenses and expenses for food incurred and apparently paid by Galdaya are deducted from a larger debt he owed to Elamma. See for records on such settlements, carried out before witnesses, *OALP* 180-2. An appendix mentions the existence of a *be’ulātu*-contract with Galdaya, which is not affected by this arrangement. Both of Elamma’s claims on Galdaya are also listed in *70:5-9 (from year eponymy REL 76) and in *74:21-24. See for Galdaya’s “service contract” *Appendix* text 8 and the comment on *70:5-9.

Translation of A.

“Seal of Lāqēpum, son of Iliya; seal of Amur-Šamaš, son of Mīšu(r)-rabi; seal of Ezē, son of Šarru-kīn; seal of Galdāya, (witnessing) that Elamma⁵ and Galdāya settled accounts with the result that after both travel expenses and his food allowance have been deducted⁸ Elamma (still) has a claim of 1 mina of refined silver on Galdāya, the son of Naku.¹¹ From the week of Amriya and Ikūnum he will add 1½ shekel per mina per month. Month VII, year-eponymy of Abiya, son of Šu-Dagan.¹⁶ Separately, there still exists a valid record of his working capital.¹⁸ We made them swear an oath by the City for these words.”

Variants of B.

Several, mainly minor differences concern the spelling of names: B:22 *E-zé-e* // A:3 *E-zé*; the name of the debtor is spelled *Ga-al-TA-a* in B and *Gal-DA-a* in A, and A:10 gives the name of his father; B:3-4 is in reversed order compared with A:6-7 and adds *mimma šumšu* in A:5; B:11 mentions that the interest is “per month”, which is omitted in A; B:19, “they swore an oath”; B:19-22, the first witness is not mentioned by A and B adds the names of the fathers of the witnesses; B:23-25 omit the qualification *harmum* and place *ahamma* before the verb.

Seals

seal A = CS 1207.

seal B = CS 533 = *99 A = Kt n/k 1800 C, the seal of Amur-Šamaš, son of Mīšar-rabi.

seal C = CS 1208, fragmentary inscription: *A-da-[x]* / DUB.[SAR] / ĪR ^d[x x]. The seal owner probably was the well-known scribe Adada, son of Adad-rabi, attested a dozen times and the seal might have been owned (used?) by Ezē, son of Šarru-kīn.

seal D = CS 998 = *119B and *115C; inscription: *Lá-qē^d-pu-um* / DUMU *Šu-Hu-bu-ur*, but on our envelope used by a namesake, Lā-qēpum, son of Iliya.

Notes

A:2. The name spelled Mīšur-rabi is more commonly spelled Mīšar-rabi (-GAL or -*ra-bī*), “Equity is great”, cf. *7:23, *99B:1 and *292:4.

A:3. Ezē, son of (king) Sargon, must have been active in Anatolia during the eponymy of year 21 of Sargon’s reign (note in Kt b/k 682:16, *E-ze-e*, son of *Be-e-a*). See for other sons of Šarrukīn attested in the texts KEL 43 and add Šallim-Aššur, son of LUGAL-GI.NA in Kt 87/k 552:40-41 (courtesy of K. Hecker).

A:19//B:18. Note the interesting variation between *nutammišunu* and *itmû*.

Comment

See for the *be’ulātu*-contract between Elamma and Galdaya text 8 in the *Appendix* and the comment on *70:5-9.

B. Three *be’ulātu*-contracts (65-67)**65. Kt 91/k 397 (1-251-91)**

Unopened envelope with an undated contract about a *be’ulātu*-loan, which (following Larsen) I translate by «working capital», belonging to Elamma and made available to Puzur-lštar, who will serve him as harnesser (*kaššārum*).

seal C = CS 1041, according to Mrs Omura identical to Kt i/k 50A.

Notes

10. *Eggar*, which should be a 1st pers. sing. (normally *aggar*), is used in a penalty clause that quotes what Elamma had stipulated. The scribes were not consistent in formulating this, since we have *eggar* (also in ICK 1, 126:8 and *EL* 161:11, object *agram*), *aggar* (Kt n/k 7:13, n/k 30:10, object *sāridam*) and a D-stem, *uggar* (TC 3, 246A:6, object *agrē*, plural; but in OIP 27, 50:3, with a singular object *sāridam*). Instead of *igrē sāridim* we also meet *igrē agrē*, “the wages of those hired” (TC 3, 246A:6).

66. Kt 91/k 473 (1-326-91)

le.e.		seal C
ri.e.		seal A

Seals

seal A = CS 534, also impressed on Kt n/k 1801 and as Kt n/k 1886B, is the seal of Ilī-nādā, son of Baziya.

seal B = CS 1200, traces of inscription, according to Mrs Omura also impressed as ICK I, 24C, = Teissier no. 247. Here the inscription is better preserved and might perhaps be read *Ha'-na-na-tu[m]* / DUMU.MÍ *Puzur₄-ša-da*, but no person of that name occurs in either text. ICK 1, 24 may mention two or perhaps three women (if Muza is one), the creditor *A-na-na* (who would not normally seal the contract) and the debtor Šatahšušar. Who used this seal on our case is not clear, the most likely candidate is Kitaya.

seal C = CS

Notes

5. Kitāya also appears as holder of this *be'ulātu*-loan in *74:3-4 and *75:3, both memorandums with excerpts of contracts from Elamma's early years (eponymic datings range from year REL 67 to 82).

6. Instead of calling the loan *be'ulātum* this contract expresses what it is verbally, *ibe"el*, "he will manage it".

9. If the absence of "per mina" is no mistake, there would be a very heavy default interest of 80% per year. The use of the verb *manā'um*, with a dative suffix (here written *-šu*) referring to the debtor, is rare in interest clauses (see CAD M/I, 224, 5, a, and also Prag I 525:9').

67. Kt 91/k 340 (1-197-91)

An oblong, black tablet recording Aššur-imittī's acknowledgment that he has in his possession a "working capital" that obliges him to work as harnesser in a caravan. The size of the capital and lines 16-18 suggest that he had received a new "working capital", presumably in addition to one he already had, which must one of 33 1/2 shekels be registered as his debt in *70:3-4. The contract for this unpaid debt apparently was replaced by the present document, because the earlier one, kept in Assur, could not be cancelled in Anatolia. The name of the person who engaged him is not mentioned, but it probably was Elamma.

1 ma-na 3 1/2 GÍN

u.e.	<i>ša be-ú-lá-tí-šu</i>	concerning his working capital
le.e	<i>sà-ar</i>	is invalid.

1. The amount of the working capital is big, it normally is ca. half a mina of silver.

9-11. This *be'ulātu*-contract is, exceptionally, dated, presumably because it replaced an earlier one (lines 16-18) and one had to know when this had happened. The double week eponymy is attested several times, but always without mention of a year eponym (see Kryszat 2004, 182). It must be placed before eponymy year REL 98, after which only single week eponyms are used, which allows the possibility that it was Elamma who contracted Aššur-imitti.

14. The sign IM is written as KAM+MAŠ.

Comment

The replacement of the older contract for 33½ shekels, mentioned in *70:3-4 (perhaps 30 shekels plus some default interest?) by a new one, which added 30 shekels to his capital, while the old contract apparently was not returned or cancelled, gave rise to a conflict. It is reflected in the much later judicial record *173, where the arbitrators stipulate that an oath of Aššur-imitti's son Amur-lštar, that he has never been shown the old contract, has to solve the problem, whereupon the children of Elamma must renounce any future claims against him. That this solution was only reached during the year REL 113 means that the affair had dragged on for quite some time after Elamma's death.

C. Memorandums listing debt-claims (68-78)

68. Kt 91/k 351 (1-308-91)

The first part of this memorandum presents the full text of a contract from eponymy year REL 85, recording a silver debt of 2 minas due by Ennānum, son of Azua, payable to Elamma in three annual installments. To it is added an agreement, concluded four months later, on the obligation of Aššur-lamassī to provide Elamma with confirmation (*ka'unum*) that he is not liable for 11 textiles belonging to Elamma and to pay for them 25 shekels apiece if he fails to do so. This is a copy of the core of *68a, with the omission of its lines 13-19.

31	IGI <i>I-dí-A-šūr</i>	of Iddin-Aššur,
	DUMU <i>Bu-^our²*-sí-sí-im</i>	son of Bursa/isum.

Notes

2-3. Ennānum, son of Azua, occurs also in *110:2, where Elamma collects silver paid for a textile belonging to him.

18. Aššur-lamassī probably was a agent working (also) for Elamma and *35:32 mentions his *be'ulātum* (if he is the same man; no patronym is given) and according to *3:11 and *9:21 he transports silver and merchandise. *68a suggests that he was present when the textiles mentioned here entered the place for taxation.

29-30. The man also occurs as witness in VS 26, 93:15, during eponymy year REL 90, and in Kt. 93 k/485:6 (courtesy of C. Michel).

31-32. The meaning of the name B/Pursa/isum is unclear to me (perhaps related to *pursāsum*, “wigg?”); it figures in *68a:20 as B/Pususū and must be identical to B/Pussaya, father of Iddin-Aššur in AKT 1, 41:15 (RE 104) and Kt. 87/k 278:4.7 (REL 110).

Comment

The connection between the two contracts is not clear; they may simply have been joined because they date to the same year. The two men, whose liability to deliver or pay for the 11 *kutānu*-textiles belonging to Elamma Aššur-lamassī has to prove, most

III. DEBT-NOTES, MEMOS AND RELATED RECORDS (54-78)

probably where brothers of Elamma, known as investors in his joint-stock capital (see text 2*:7-11). Aššur-lamassī, when asked for the textiles or their yield may have declared that he had delivered them to the two brothers or that the latter had not given them to him. He is now obliged to prove this or pay Elamma 25 shekels of silver apiece, the price a good *kutānum* could yield in Anatolia. That he gets five months to prove his claim indicates that the two men lived in Assur, so that it took time to bring the evidence.

See for the procedure of “confirmation” (*ka”unum*) and the various constructions attested, the introductory remarks to Ch. V, A.

68a. Kt 91/k 342 (1-198-91)

This is probably the original agreement, the core of which was copied in *68:16-32. Lines 13-19 indicated that the textiles had arrived with Lā-qēp’s caravan and had entered the palace in Kanesh for levying the tax. If the palace has bought additional textiles, more than the customary tithe, Aššur-lamaasī liability to pay for them will be reduced.

	<i>a-na 11 TÚG ku-ta-ni</i>	Concerning 11 <i>kutānu</i> -textiles,

	<i>IGI A-bu-ša-lim</i>	B/Pususu, of Abu-šalim,
u.e.	<i>DUMU I-dí-Èr-ra</i>	son of Iddin-Erra.

Notes

I am grateful to Hakan Erol to have provided me with a transliteration of this tablet, which I had overlooked.

13-17. The words “per 10 textiles 1” (*ešartum ištēn šubātum*) denote the tithe, *išrātum* (also called *ša šīmim*, “those of the purchase”), which the palace was allowed by buy at favorable conditions from incoming caravans. We know that it bought often less, but

III. DEBT-NOTES, MEMOS AND RELATED RECORDS (54-78)

occasionally more pieces. My interpretation is that if the palace had bought more than 1 of the 11 textiles, Aššur-lamassī liability to pay for them to Elamma, here designated by “his *kišdātum* (“what accrues to him”, which can be positive and negative), will be accordingly reduced. The emendation in line 15 is an attempt to make sense of *ilqešu*, which as it stands can only have Aššur-lamassī as subject, while the suffix *-šu* is strange; it might refer to one additional textile taken, but this conflicts with the plural *waṭrūtīm*. A plural *ilqe’ū* could refer to the palace authorities.

18-19. This statement is syntactically not connected with what precedes, but indicates that the textiles in question had arrived with the caravan mentioned. The caravan of Lā-qēp, son of Qa’atum, is also mentioned in *5:9, where Elamma and his brother are said to have a deposit in it (perhaps in the palace) of 4 $\frac{2}{3}$ minas of silver.

21-22. The same man figures as witness in VS 26, 93:15, during eponymy year REL 90

69. Kt 92/k 114 (1-76-92)

Memorandum written in a fine, small script, about seven debts of silver and copper owed to Elamma, dated between eponymies REL 75 and 89, and two owed to his son Aššur-ṭāb (cf. *60A:9), dated to eponymies REL 90 and 95.

(1) “Seal of Adad-pilah, son of Aninum, seal of Aššur-lamassī, son of Lā-qēp, seal of Nazi, son of Puzur-banini. 3 minas of refined silver Aššur-lamassī, ⁵ son of Lā-qēp, owes to Elamma. He will pay within 24 months from the week of Elamma and Zuba. If he does not pay when his term is up, he will add as interest 1½ shekel per mina per month. Month I, eponymy of the successor of Šu-Hubur (= 89).

(2) ¹² 8 minas of refined silver Šuli, son of Puzur-Abeh, owes to Elamma. He will add as interest 1½ shekel per mina per month. Eponymy of the successor of Baziya, son of Šēp-alim (= 75).

(3) ¹⁶ Seal of Ilī-bāni, son of Ibni-ilī; seal of Aššur-mālik, son of Puzur-Aššur; seal of Iddin-Aššur, son of Puzur-Abeh¹. 4 talents 32 minas of copper from Haburata Iddin-Aššur, son of Puzur-Abeh, owes to Elamma. He will pay within 14 weeks from the week of Aššur-rēšī. If he does not pay he will add interest in conformity with the rule of the colony.

(4) ²⁴ Seal of Šu-lštar, son of Ennum-Aššur, seal of Ikūn-mīšar, son of Ilī-dān, that Ikūn-mīšar, son of Ilī-dān, owes 8 shekels of refined silver to Elamma. He will pay when he returns from the City.

(5) ²⁸ Seal of Ididi, seal of Dudurum, seal of Aššur-nādā, seal of Aššur-dūrī. 2 minas 10 shekels of refined silver Aššur-dūrī owes to Elamma. He will pay within 8 weeks from the week of Ānah-ilī. If he does not pay he will add interest per mina in conformity with the rule of the colony. (Another tablet) apart from this tablet that turns up is invalid.

(6) ³⁶ Seal of Zuba, son of Aššur-rē’ī, seal of Šu-lštar, son of Sū’aya, seal of Baṭu-šar, son of Sukuhum. ½ mina of refined silver Baṭu-šar owes to Elamma. He will pay within 6 months from the week of Sukkallum and Kura. If he does not pay he will add an interest of 1½ shekel per mina per month.

III. DEBT-NOTES, MEMOS AND RELATED RECORDS (54-78)

(7) ⁴³ Seal of Iddin-Suen, son of Itūr-ilī, seal of Nāb-Suen, son of Abī-ilī, seal of Idnāya, son of Kutaya(?). 12 shekels of refined silver Iddin-Suen, son of Itūr-ilī, owes to Aššur-ṭāb. From the week of Pūšu-kēn and Ennum-Bēlum, month IV, eponymy of Aššur-idī (= 95).

(8) ⁴⁹ Seal of Aššur-šamšī, son of Ilī-tūram, that Ištar-ilšu, son of Azuzaya, owes 45 shekels of refined silver to Aššur-ṭāb. <From> the eponymy of Ali-ahum (= 90) he will add 1½ shekels per (mina, per month) as interest.”

Notes

1-11. See for the original debt-note (without envelope), text 9 of the *Appendix*.

12-15. The same debt appears in *70:19-24, dated to the same year, where the amount is 8½ minas and Šuli is the son of *I-li-lī*.

18. Since *hab(b)urum* would be unique, I assume a scribal mistake for *ha-bu-ra-<ta>-am*, a rare by-form of the nisbe normally written *ha-bu-ra-ta-i-am* (see *307:8 and *Copper* 217).

21. The week-eponymy of Aššur-rēšī is thusfar unique.

32. The single week eponymy of Ānah-ilī (l. 32; not yet recorded in Kryszat 2004) is elsewhere attested for eponymies REL 74 (Kt n/k 244:8//505:23) and 77 (Kt 94/k 536:5).

39. The double week eponymy of Sukkallum and Kurā (lines 39-40) occurs a few times, but never with mention of a year eponym. In the memorandum Kt c/k 129:15f. (courtesy of Dercksen) it is preceded and followed by debts dated to months X and XI of eponymy REL 84.

44. The reading of the first syllable of *Id-na-a* and of the end of *Ku-ta-a* are not fully certain, but there is a Kutaya, son of Idnaya (ICK 1, 188:30, etc.).

49-51. The original contract of this debt, still in its envelope, where Aššur-ṭāb is identified as son of E[lamma], is preserved as *60, where the date is specified as month VII. Its preservation suggests that the debt was not paid and this may explain its appearance among outstanding claims in our memorandum.

Comment

That all eight contracts are excerpted in the same memorandum means that they were debts owed to the same “firm”, which comprised Elamma and his son Aššur-ṭāb. That the two debts owed to the latter are later in date than the six debts owed to Elamma could imply that Aššur-ṭāb had taken over from his father, but not because of his death, because in REL 92 Elamma is still attested as week-eponym (VS 26, 94B = *EL* 172:7-12). Contracts 7 and 8 show that Elamma’s son carried out transactions in his own name, presumably for his own account. His two debtors, as far as I know, do not occur elsewhere with their patronyms. How long after the latest eponymy year mentioned (REL 95) this memorandum was drawn up, is unknown, but it registers (not in chronological order!) several debts that were between 10 and 20 years old.

70. Kt 91/k 359 (1-216-91)

A large memorandum on a tablet of 8.0 x 5.5 cm, listing 21 debt-claims (which I have given sequential numbers) on different persons for in all nearly 15 minas of silver and more than 21 talents of copper. They range from small amounts (25 shekels of silver, as working capital in l. 5; 15 minas of copper in l. 30) to large ones (8½ minas of silver in l. 19, and 11 talents of copper in l. 35), and apparently reflect quite different business

III. DEBT-NOTES, MEMOS AND RELATED RECORDS (54-78)

contacts. The two dated claims are from eponymies REL 75 and 76 (lines 24 and 9). There is some overlap with the memorandums *74, *71, and *69, and the last, where the creditor is identified as Elamma, shows that all those of our text are of him too. Some of the debtors listed here also occur as such in other documents, for different amounts, which shows that they had more frequent relations with Elamma.

Notes

III. DEBT-NOTES, MEMOS AND RELATED RECORDS (54-78)

3-4. See *67:1-4, where the working capital is 63½ shekels, after addition of ½ mina of silver; this gave rise to this a new contract, which implied cancellation of the old; see also the comment on *173.

5-9. See for both debts owed by Galdaya *64. His service contract, whereby he received 25 shekels of silver and which indentifies him as “Galdaya of Elamma”, has turned up in the archive of Elamma’s brother Ali-ahum, as Kt 93/k 166 (courtesy of C. Michel, see *Appendix* text 8). Its witnesses, Lā-qēpum, Amur-Šamaš and *E-ze-e* (a son of king Šarrum-kīn), are the same persons who witnessed *64, which suggests that the undated *be’ulātu*-contract was from the same time (REL 76). *286:19-20 mentions an Elalī, son of Aššur-ennam *ša bēt Galdaya*.

29. See the comment on *55.

34. The strange PN *Da-zu-a*^dIM is not attested in other sources; the man could be Anatolian.

Comment

This memorandum lists many debts of silver and copper, but the underlying transactions are usually not mentioned. Two debts are working capitals (*be’ulātum*) given to persons who must have served Elamma, Aššur-imitti (l. 3f.) and Galdaya (l. 5f.). Most listings only mention the amount and the debtor, a few also a date and/or interest (7ff., 10ff., 19ff.), and only in one case a witness is recorded (l. 36). The dates REL 75 (l. 24) and 76 (l. 9), show that this an early text, which is confirmed by the existence of duplicates mentioning a number of debts:

2 33½ sh si Aššur-imitti see *67:1-4, where the *be’ulātum* is 30 shekels more.

3 25 sh si *be’ulāt* Galdaya // *74:21-24, ½ mina silver

4 1 mi si Galdaya +date // *74:22f., *75:23f., and *64 (from month VII, year 76).

10 5/6 mi si Aššur-bāni // *54, the original contract in an unopened case, dated to eponymy year REL 67, gives the debt as ⅔ mi. si.

11 8½ mi si Šuli s. Ellil-īlī // *74:4f., 8 mi. si.; Šuli s. Puzur-Abeh, also in *75:4 and *69:12f. (from month I, eponymy year 74).

12 1½ m si Aššur-dūrī // *74:15f., 2 mi.10 sh. si., year REL 67, also in *75:5f. and *69:28f. (term: 8 weeks)

13 5 tal cop Iddin-Amurru s. Šuhanum // *74:1f., 4 tal. 42 mi., but *75:1ff. has 6 tal. 42 mi.; *73 mentions how this amount became 4 tal. 42 mi.

14 1½ mi si Idnāya // *74:6f., 3 mi. 3 5/6 sh. si., eponymy REL 82, same in *75:2f.

71. Kt 91/k 460 (1-313-91)

Memorandum with excerpts from eight debt-notes (numbered in the margin of the translation) for in all nearly 2 talents of copper and 2 minas 43 shekels of silver, two of which are dated, both to the eponymy year REL 88. The excerpts become shorter in the course of the text, the first also mentioning the debtor’s father, the date and interest, the last only the name of the debtor and the amount of the debt. The creditor is not mentioned, but probably is Elamma.

Notes

2. *ma-na-am* is a mistake for *mana'um*. The rate of interest is exceptionally high, 20% per month; it resembles that in lines 13-14, 10 shekels per mina, but here "per month" is missing.

7-8. Cf. the debt of 2 talents 13 minas of copper owed by the same man according to *70:16-17, preceded by the same debt of Šallim-Aššur as recorded in lines 8-9 of our text.

9. The same man in *70:16 (debtor for 1¼ mina of silver) and *137:13.

11. See for this payment clause the comments on AKT 5, no. 44:13'ff.

13. The debtor might be same man who had received a *be'ulātu*-loan according to lines 29-31.

24. This is the first occurrence of the name D/Tukšum.

26. The qualification *mazzāzum* is thus far unique in OA and it is unknown which function this man, present in Anatolia and indebted for a small amount of copper, held. Another *mazzāzum* seems to be a statue, as a votive gift (several times in the combination copper/silver designated as *ikribū ša mazzāzim*), cf. Dercksen, *ArAn* 3 (1997), 84-5 (pace CAD M/I, 238 s.v. *manzāzu*, 6; see now also in Kt 94/k 1204:8-10, courtesy Larsen, *kaspum ša ikribē ša mazzāzim ša l.*).

III. DEBT-NOTES, MEMOS AND RELATED RECORDS (54-78)

72. Kt 91/k 360 (1-217-91)

Memorandum on in all 17 different claims and transactions (sequential numbers are added in the margin of the translation), the latter (lines 26-30 and 40-41) recorded as “I gave” and “I left behind in the house”. The debt claims, with the exception of a single reference to a week-eponymy in lines 12-13, are not dated; the debtors are Assyrians, apart from one “native Anatolian” (l. 8). Most are debts in silver and some include (the price of) a few textiles (lines 8, 16, 19); lines 21f. mention silver and an expensive robe given to purchase textiles (in Anatolia or Assur?), l. 28 some silver given as a *tadmiqtu*-loan.

	<i>1½ ma-na KÙ.B. ṣa-ru-pá-am</i>	1½ mina of refined silver	debt

Notes

12-13. A rare reference to this week eponym alone, who usually figures as one of a pair, but only once dated, to eponymy year REL 86, month III (Kt c/k 41:32).

22. See for this type of textile Michel-Veenhof 2010, 220 s.v. *Malku(w)aīum*, a nisbe only used of *kusītum*, with *Alkuaīum* probably as a variant or mistake. It was an expensive piece exported from Assur to Anatolia.

41. The meaning of *megānum* is unknown.

73. Kt 91/k 461 (1-314-91)

This debt-note is inserted here because of its close relation with the memos *74 and *75. It records a copper debt still due by Iddin-Amurru to Elamma, after deduction of part of the initial debt that is now due by Aššur-rē'ī. It is dated by a week eponym whom we cannot date exactly, but who must be placed somewhere between years REL 82 and 91.

i-6 GÚ 22 ma-na URUDU ša l-dí ^d MAR.TU DUMU Šu-hi ¹ -Inim a-na E-la-ma ha-bu-lu	Of the 6 talents 22 minas of copper that Iddin-Amurru, son of Šuhanum, owes to Elamma,
1* GÚ 40 ma-na URUDU KI A-šur- 5 DUMU l-dí-da i-ku-ul [SIPAD	1 talent 40 minas of copper are due from Aššur-rē'ī, son of Idida, who used it.

10 l-tur ₄ -DINGIR a-na 1 GÚ-tim 1 ma-na<-um> ½ ma-na.TA	Itūr-ilī, he will add an interest of 1½ ¹ mina per talent
l.e. <ḫ>-IT ₁ .KAM ú-ša-áb IGI Da-/da-ni rev. IGI Li-ba-a IGI Lá-qé-ep (remainder not inscribed)	per month. Witnessed by Dadani, by Libbaya, by Lā-qēp.

Notes

1. Cf. *75:1. This is the amount of the original debt; *74:1f. mentions the amount after deduction of that of l. 4. The latter, if rounded off, might be the same as the 5 minas of *70:26f.

2. The name of Iddin-Amurru's father, Šuhanum (also in *70:26), is not attested elsewhere.

4. This man occurs in *120:2 and VS 26, 109:27 as witness.

III. DEBT-NOTES, MEMOS AND RELATED RECORDS (54-78)

6. The remaining debt of Iddin-Amurru, the result of this accounting, should be the amount mentioned in *75:1, where, however, the tablet has 6 GÚ 42 *ma-na*.

8-10. This week-eponymy is not attested elsewhere; the “son of Itūr-il” could be Puzur-Aššur, since identifying somebody as “son of ...” usually occurs with very common names.

10. Since “per 1 talent” and “per 1 mina” are contradictory and “ $\frac{1}{2}$ mina per mina per month” would be an incredibly high rate, “per 1 mina”, so common in silver debts, must be a mistake; the scribe must have meant $\frac{1}{2}$ mina = 10% per year, although this is a very low rate.

74. Kt 91/k 428 (1-181-91)

75. Kt 91/k 462 (1-315-91)

74 (A) is a memorandum about ten debt-claims amounting to nearly 17 minas of silver and more than 6 talents of copper. Two of them are dated, to the year REL 67, the earliest date attested in the archive, and to REL 82. Many entries are known from other memoranda.

75 (B), only inscribed on its obverse (7.8 x 5.9 cm), is a duplicate of A, with a few variants, mentioned in the notes to this record.

	4 GÚ 42 <i>ma-na</i> URUDU <i>iš-tí</i> <i>l-dí-d</i> MAR.TU	4 talents 42 minas of copper with Iddin-Amurru;
	$\frac{1}{2}$ <i>ma-na</i> KÙ.B. <i>be-ú-lá-at</i> <i>Ki-ta-a</i> 8 <i>ma-na</i> KÙ.B.	$\frac{1}{2}$ mina of silver, working capital of Kitaya; 8 minas of silver

20	KI <i>Ba-al-ṭu-im</i> $\frac{1}{3}$ <i>ma-na</i> 5 GÍN <i>be-ú-lá-at Gal-da-a</i> 1 <i>ma-na</i> KÙ.B. KI <i>Gal-da-a</i>	25 shekels (of silver) working capital of Galdaya; 1 mina of silver with Galdaya.

Notes

A 1. B:1 has 6 GÚ 42 *ma-na*, but *73:6 confirms the figure of A; see the note on *73:1.

III. DEBT-NOTES, MEMOS AND RELATED RECORDS (54-78)

A 3-4. B omits KÙ.B.; the original, undated *be'ūlātu*-contract is preserved as *66; cf. also *111 on Kitaya's work as transporter.

A 4-10. See the comment on *55 on the relation between Elamma and Idnāya.

A 7-10. B:6 ends with what is A:7a, after which it inserts a ruling, omits lines 7b-10 of our text and continues with A:11.

A 12. B: 8, as expected, adds KÙ.B.

A 13-14. The same debt is recorded in *62 and *69:24f.

A 15-19. The same debt is recorded in *69:28f. (term of 8 weeks).

A 20. *Ba-al-ṭū-im* (genitive), a strange spelling (in A and B) of Baṭum, probably short for Baṭu-šar, who is registered with the same debt, owed to Elamma, in the memo *69:38f. But note *Ba-al-ṭū-um* in *263:8, where a genitive is required.

21-24. B:14 adds KÙ.B. in l. 21. See for these debts of Galdaya the note on *70:5-9.

76. Kt 91/k 497 (1-350-91)

This big memorandum (7.5 x 5.8), whose reverse is heavily damaged, lists many debt-claims, most in copper. It was excerpted from "tablets that are in the house of" (lines 41-42, name unreadable, but not Elamma). The first part lists claims in copper, in all more than 20 talents, later also some claims in silver follow, but the gap in and damage of the reverse deprives us of further data. The creditor remains anonymous, but this record is presented here because lines 17-21 list a debt of Uršiši for which Elamma and his brother Amur-Ištar had been registered as guarantors and this agrees with the date of two other occurrences of Uršiši (see below, note on lines 16-22). Being mentioned as guarantor means that Elamma, at least in this case, was not the creditor, unless the guarantors had paid for the debtor, which would have turned them into creditors of Uršiši, whereby his original debt-note would have been ceded to them. It is uncertain whether Elamma was the creditor of the other claims and in any case this memo must have been drawn up somewhat later. From memo *77 we learn that some of the tablets excerpted in *76 (lines 10-13) were "left to our Šu-Bēlum", to all appearances Elamma's son. That, according to that memo, no less than seven boxes with tablets were left to him was a drastic measure, possibly related to Elamma's death. It is unfortunate that the name of the owner of the house(?), where the tablets excerpted in *76 were kept, is unreadable, but it is tempting to assume a connection with the transfer of the boxes of tablets mentioned in *77. This removal or transfer also explains why none of the original debt-notes excerpted here has been found in Elamma's archive.

---	---

Notes

4. Same name in ICK 1, 187:17.

10-13. These two claims on Ennam-Suen, son of Ikua, are also recorded in *77:5-10, where the relevant debt-notes are said to have been left (for safekeeping or collection)

III. DEBT-NOTES, MEMOS AND RELATED RECORDS (54-78)

to “our Šu-Bēlum”. Kt a/k 977 (dated to eponymy REL 91) records a copper debt owed by this Ennam-Suen to Ilabrat-bāni, which has been running for six years. Ennam-Suen is known from AKT 6a, 184:15f., 190:4f., and 251:13.32, always as witness in records dealing with the aftermath of Šallim-Aššur’s death, hence from eponymy year 105 or later. In ATHE 22:1 he is assisting the family of the dead Ikūn-piya in the matter of a debt owed to the sons of Pūšu-kēn, apparently after the latter’s death.

16-22. It is unlikely that lines 16-17a are, by mistake, repeated as 17b-18, because the *-ma* after Uršiši implies he had been mentioned before. His debts are the only ones in silver and according to lines 21-22 he also held a “working-capital”, so that he must have served as harnesser of the creditor. Unfortunately, these are the only occurrences of him in texts of the archive, but considering the rareness of the name he is probably identical with Uršiši, son of Uphaqum, attested in BIN 4, 206B (*EL* 210): 2. Dated occurrences of him are in TC 3, 91:4 (where he has a debt of 4 minas 26 shekels of silver), in eponymy year 84, and he served as week-eponym in eponymy year 83 (Kt n/k 124:4). He also appears as debtor in ICK 2, 127:15 (7 minas of silver) and Kt c/k 699:3 (5 minas of silver, due to Buzutaya).

19-21. In l. 21 I have restored the stative of *lapātum* Gt, as attested elsewhere to expressed the somebody had himself registered as guarantor (see Veenhof 2001, 105 with notes 30-32). The second guarantor, Amur-lštar, probably is Elamma’s brother, identified as son of Iddin-Suen in Kt 93/k 529:12 and 607:13 (courtesy of C. Michel).

41. A *be’ūlātu*-loan of 16 shekels of silver, owed by an Atahšu, is recorded in the undated contract *313, which does not mention his creditor/employer. One might identify this loan with the 10 minas of copper and 6 shekels of silver of our memo (equating 10 minas of copper with 10 shekels of silver, at 1:60), but since there is no other example of a composite *be’ūlātu*-loan the 6 shekels in our text could be a mistake for 16 shekels.

77. Kt 91/k k 514 (1-367-91)

A memo, whose writer is not mentioned, stating that quite a number of tablets, seven boxes full, were left to “our Šu-Bēlum”, presumably the son of Elamma, and also (separately?) three other tablets, two of which are excerpted in the previous memo (*76:10-13).

Notes

3. "Our Šu-Bēlum", must refer to Elamma's son of that name and the anonymous speaker probably was his father, a brother or a close business associate.

4,16. The "leaving behind" (*ezābum*) could be as safe deposit, because the owner went away, or in order to collect these debt-claims for the creditor.

5-10. The excerpt in *76:10-11 qualifies the copper as *lammunum*, "bad", and identifies the debtor as son of Ikua.

18. The name of Išuhum's father is not attested elsewhere.

78. Kt 91/k 472 (1-325-91)

This black, unopened case, with 8 impressions of 3 different seals, contains a witnessed record to the effect that silver due to Ikūn-pī-lštar by Elamma as payment for tin, has been received by Imdī-ilum. It must have served Elamma as a quittance, as shown by the standard phrase that the recipient of the payment has to clear Elamma from possible claims of the original creditor.

Notes

III. DEBT-NOTES, MEMOS AND RELATED RECORDS (54-78)

1. A man of that name occurs in Prag I 446:5-7 during eponymy year REL 132. Other occurrences in CCT 6, 45c (recipient of the letter), Prag I 478:5, ICK 1, 121:3-4 (during a double eponymy attested for eponymy year REL 86, cf. Kt c/k 41:32), KUG 9:10-11, ICK 2, 76:8'-9'+ICK 1, 46+its fragmentary case ICK 2, 77 + KKS 45. The temporal distance between occurrences in REL 86 and 132 suggests that we may have to do with a man and his grandson, the more so since also an Aššur-mālik, son of Lā-qēpum, is attested (both together in Prag I 446:5 and 15). The occurrence of Elamma and Imdī-ilum in our text implies that the earlier Lā-qēpum is meant.

Comment

This is not simply a quittance for the payment of a debt, but a record establishing before witnesses that a commercial debt of Elamma to Puzur-Ištar had been received or collected by Imdī-ilum. Lines 8-10 suggest that the creditor had died and that Elamma, possibly because he had not received his debt-note back, made Imdī-ilum acknowledge the receipt of the debt and assume the traditional responsibility of clearing the debtor, if the investors and sons of Puzur-Ištar, when liquidating his business, would dun him for payment. We do not why and how Imdī-ilum had collected the payment due by Elamma.

III. DEBT-NOTES, MEMOS AND RELATED RECORDS (54-78)

D. Alphabetical List of Elamma's debtors

Debts in si(lver) or co(pper), in t(alents), m(inas), or s(hekels) and qualified as *be('ulātum)* or text(iles). Dates are in eponymy years (REL) and months (I-XII) or *h(amuštum)*, due dates in m(onth), w(eek), (*ana*) *ettišu*, return (from) ..., arrival, *adrum* (threshing floor), or harvest.
