

VII. TRAVELING AND TRAVEL-EXPENSES (145-153)

145. Kt 91/k 424 (1-277-91)

A memorandum in the first person singular on travel expenses in copper for what seem to be two different trips. The first one (lines 1-20) presumably was a return trip from Wahšušana via Šaladuwar to Burušhattum; the second from Wahšušana via Tuhpiya to Durhumit and from there via Kanesh back to Wahšušana. The text was already used in *Geography*, where lines 1-23 are quoted in footnotes 1243//1432 and 1479.

	[x]* °ma ₂ -na ší-kam ig-ri ša bi ₄ -il ₅ -/tim [a]-dí Ša-lá-du-a-ar a-dí-in 20 ma-na ší-kam i-na Ša-lá-du-a-ar ú-ša-qí-il ₅ 3 ma-na a-É	I gave [x] minas of šikku-copper as wage of a porter until Šaladuwar, 20 minas of šikku-copper I paid in Šaladuwar, 3 minas I gave

u. e.	[a-d]í Wa-ah-šu-ša-na ag-mur [š]a 4 GÍN KÙ.B. sà-he-er-tám [al-q]é-ma ga-me-er	until Wahšušana, I acquire and spent small wares for a value of 4 shekels of silver.

Notes

1. Little room for the missing first sign, probably 10 or ½.

7. Tarkua must be a personal name. I know of no other occurrences, but cf. *Ta-ar-ku-a-lá* in Kt 89/k 287:11.

12. Ušb/pug/kattum[?] is unknown from other sources. Reading *adi ušbu ga-°me¹-e₂r*, “were spent while they stayed there,” is not supported by the traces and *ana gamrim gamer* is pleonastic.

19. See for *nab/prītum*, “paddock”, “stabling”, the note on *43:18.

22. The sign KIB with the value */dur₄/* seems to be used here for */tuhₓ/*. Its shape is similar to that in *146:23.25 (*Dur₄-hu-mi-id*), which suggest they were written by the same scribe. Forlanini 2012, 297 doubts whether the reading *Tuhₓ-pi-a* in our text, important evidence for its location between Wahšušana (which he would like to locate near Ankara) and Durhumit, is justified. The writing is indeed unique (the occurrence in Kt a/k 253b:27, mentioned in *Geography* footnote 1241, is uncertain and the context does not favor a place-name), but the reading seems probable, considering the occasional ‘creative’ use of signs by OA writers and because no town called D/Turpiya is known. The fact that expenses in copper from Wahšušana to what I take as Tuh/piya were 1½ mina of copper and from Tuh/piya until Durhumit twice as much, 3 minas, corresponds with the distances between Durhumit, Tuhpiya and Wahšušana, as drawn on Barjamovic’s map.

25. Note that in *146:24 too a payment of refined copper takes place in Durhumit, the centre of the copper trade.

Comment

Barjamovic in *Geography* uses our text as an important source for the reconstruction of the geography of the area east and west of the middle course of the Kızılırmak, with the cities Tuhpiya, Wahšušana and Šaladuwar. He assumes that Wahšušana is located east of the Kızılırmak and north of the Tuz Gölü, possibly at the crossing of the river at Büklükale, on whose lower terrace pottery sherds of the *kārum* level II type were found (personal communication M.T. Larsen). If so it is situated on the copper route that ran from Durhumit to Burušhattum, at the point where a crossroad east of the Kızılırmak and a road from Kanesh met (*Geography* 307 with note 1243, where he also adduces VS 26, 66:3-15; see the separate folding map “Anatolia ca. 1880 BC”, added to *Geography*). On p. 354f., with note 1479, he uses our text also as evidence that the copper road coming from Wahšušana passed through Šaladuwar (across the Sahiriya river) before reaching Burušhattum, located further to the south-west, possibly in the area east of Hittite Kuwaliya and north of the Sultan Dağ, near Bolvadin (see his map 20). Forlanini 2012, rejects these last proposals (including the location of Durhumit) and we have to wait for a further evaluation of the facts, hopefully helped by new textual or archaeological data. During the recent excavations by Mrs M. Omura on the tepe of Büklükale, under some later deposits thus far only architecture from the Early Bronze Age has been exposed (personal communication). Excavation of the lower river terrace (mentioned above) might provide valuable textual evidence, to confirm or disprove Barjamovic’s and Forlanini’s proposed identification with Wahšušana or Durhumit.

VII. TRAVELING AND TRAVEL-EXPENSES

This record lists expenses during a journey, perhaps from Kanesh via Hanaknak to Durhumit in the north and from there to Wahšušana, also the final destination of the trip of *145. The text was published in Veenhof 2006 as no. 1 and was subsequently quoted and used by Barjamovic, *Geography*, in discussing the location of Durhumit (§5.1) and Hanaknak (§5.3). In his footnote 983 he offered a full transliteration with some improved readings (in lines 19 and 22) and notes that this text and *147 “were written with the same broken styles” and thus probably belong to the same archive.

	1½ GÍN AN.NA <i>i-na a-al Bu-uṭ-/</i> <i>a-É wa-áb-ri a-dí-in</i> [*[n]a-tim	1½ shekel of tin in the town of Buṭnātum I gave to the caravanserai.

25	<i>i-na Dur₄-hu-mi-it a-kà-ší-im</i> <i>a-dí-in</i> 5 <i>ma-na URUDU</i> <i>SIG₅ i-nu-mi a-na Wa-ah-šu-ša-na</i> <i>^our₂-ki TÚG.HI.A i-li-ku a-qá-tí</i> <i>ì-lí-úš-ra-ni a-dí-in</i>	3 pounds of refined copper, import-tax, in Durhumit I gave to the chief. 5 pounds of refined copper I put at the disposal of Ilī-ušranni, when he went to Wahšušana in pursuit of my textiles
30	10 <i>ma-na URUDU ší-kam lu a-É ub-ri</i> <i>lu gám-ri i-na Wa-ah-šu-ša-na</i>	10 pounds of <i>šikku</i> -copper for the caravanserai and expenses in Wahšušana.

Notes

1. I take *buṭnātum* as "pistachio trees", a word not yet attested in Old Assyrian. While its occurrence in Anatolia is not surprising (see now *buṭnātim Burušhaddētim* in T. 125:16f., from Mari, cf. J.-M. Durand, in *Studies Veenhof*, 2001, 130), the use of an Assyrian name is, since Assyrians normally use native Anatolian town names. The writer may have translated an Anatolian name or he himself may have called the village after a prominent local feature, its trees. This might explain why it is not a real place

name, but a designation of the type "the town of..." (*āl* ...), used in combination with a personal or divine name, a gentilic, or a noun referring to a specific local feature. Cf. *āl Kupilšan* (our text lines 17f.), *āl l-a-ša* (Ka 1113:4, usually contracted to *A-li-a-ša* cf. CCT 2, 39:26 and now R. Kuzuoğlu, *ArAn* 7 (2004) 75ff.), *āl ZI-ZI-im*, "the town of" (RGTC 4, 7, with discussion), *āl dUTU*, "the town of the sungod" (RGTC 4, 7), *āl iššurātīm*, "the town of the birds" (AKT 5, 56:3), *āl tī-im-ni-e*, "the town of" AKT 5, 20:18 and 21:16). The latter is perhaps a gentilic, comparable to *ālūm ša Hatti'ē* (KTS 1, 8a:4f.), and especially to *āl Kà-ni-šī-e/i*, "the town of the Kaneshites", now attested in *149:14f. and *151:6.

4. *ni-IS-GA-ru*, after *ašar*, looks a verbal form in the plural, cf. lines 7 and 16, but from which verb is unclear and one would expect vowel harmony.

13. The purpose of the payment of 14 shekels of silver was omitted by mistake; the amount matches the cost of replacing a dead donkey.

21. I follow Barjamovic's reading *Ta-e-dī-zi-na*, cf. the writing of E in line 16.

30. *šikku*-copper is "a primary smelting product containing many impurities", whose value was usually half or one-third of that of fine quality copper, see *Copper* 42.

147. Kt 92/k 3 (1-53-93)

This record, first edited as Veenhof 2006, 780 no. 2 (collation led to a few changes, see the notes below) is a first person singular memorandum on expenses for a trip which began southeast of Kanesh, in Hurama (Forlanini prefers Luhuzaddiya), and via Šamuha reached Kurnat in the north. The text was used and quoted several times in *Geography*, where a complete transliteration is given in footnotes 504 and 982. This record, an "isolated text" (see Introduction XXVII) is presented here so that it can be discussed together with similar expense accounts.

	1 GÍN KÙ.B. <i>i-na</i> <i>Hu-ra-ma a-na É</i> <i>ub-ri a-dí-in</i> 12 GÍN <i>pá-zu-ur-tí</i> TÚG.HI.A	One shekel of silver in Hurama I gave to the inn. (The costs of) smuggling

VII. TRAVELING AND TRAVEL-EXPENSES

	<i>a-dí-in iš-tù Kà-ra-/ah-na</i>	From Karahna until
	<i>a-dí Ku-bu-ur-na-<at> 3 GÍN</i>	Kuburnat the costs of porters
	<i>KÙ.B. ša bi-lá-tim</i>	amounted to 3 shekels of
	<i>ik-šu-ud 6 GÍN KÙ.B.</i>	silver. 6 shekels of silver
25	<i>ni-is-ha-tim a-ZU-LI*-[x (x)]</i>	import-tax to/for
	<i>a-dí-in : 2 GÍN AN.NA a-na É [ub-ri]</i>	I gave. 2 shekels of tin
	<i>a -dí-in</i>	I paid for the inn

Notes

3. The amount paid for smuggling was by mistake omitted in the edition of 2006.

4-6. See for such payments, usually to Assyrian transporters, *AOAT* 314-16. The Assyrian mentioned in line 6 is known from CCT 4, 6f:5 (as transporter) and kt 91/k 141:49. Smuggling could take place in various regions, but apparently rather often to get merchandise from the plain of Elbistan directly to the north, bypassing Kanesh, via what is called the "Narrow Track" (*harrān sukinnim*), discussed in *Geography* 169-180.

6. In CCT 4, 6f.:5f. this man brings some gold to Aššur-nādā; in the undated, anonymous memorandum Kt 91/k 141:48f. he figures as debtor for 20 shekels of silver

8. The restoration was suggested by Barjamovic; "his lodging" must refer to the amount the smuggler received for expenses to use such facilities.

10. There are several references to bridges (*titurum*), most probably only for smaller rivers, see *Copper* 13, and *Geography* 22ff. They are mentioned both as topographical landmarks (KTP 26:2ff., wages paid to a transporter "until the bridge"; Kt m/k 127:5f., an escort "which went until the bridge") and as a facility for the use of which (*ana t.*, Kt n/k 1582:8), "at which" (*ina t.*, Kt t/k 25:10) or "for the cost of which" (*ana ša t.*, Kt m/k 127: 8) a fee had to be paid. Bridges of course also made ideal tolls, hence in AKT 3, 34:7, "they levied a toll of 20 shekels (of copper) per donkey at the bridge" (*ina titurrim ... issuhū*). See for a possible (wooden) bridge over the Kızılırmak in the vicinity of Šamuha, *Geography* 152f.

18. With *Geography* 282. A small amount of tin (ca. 13 grams) as a gift to the "mayor".

20. "Commander", assuming that the well-known *rabi sikkitim* had a military function.

25. Neither *a-pá-ti Kà-[ni-iš]*, nor *a-pá-ti Kà[-ra-ah-na]* (see for the use and meaning of *pātu* and *battu*, *Geography* footnote 871) are acceptable, since the traveler is far north of Kanesh and has already left the area of Karahna. Moreover, one does not pay taxes "for the border of ...", but "at the border of ...". Barjamovic therefore prefers *a-ba-te ša*, "at the border of [GN]". A final collation suggests that the signs after A are rather ZU LI (the beginning of this sign is different from DÍ elsewhere in this text), than BA DI GA, but I do not know what is meant.

Comment

Geography, footnotes 911 and 1065, asserts that that this text and *146 "were written with the same broken stylus" and therefore come from the same archive. He considers it possible that *146 "offers a detailed record of a small part of the same journey as *147, adding "but if Hanaknak and Kuburnat were located on alternative routes to Durhumit this invalidates the suggestion". On p. 151 he calls our text "the most important itinerary for the location of Šamuha" and on p. 282 values it for locating Karahna "in precise relation to Šamuha and Kuburnat".

148. Kt 92/k 111 (1-73-92)

VII. TRAVELING AND TRAVEL-EXPENSES

Memorandum on travel expenses for a journey from Wahššana, via Kanesh, Hurama, Timilkiya Hahhum, where the Euphrates was crossed, and Burullum until Assur.

	<i>iš-tù Wa-ah-šu-ša-na</i>	From Wahššana
	<i>a-dí Kà-né-eš da-tum</i>	until Kaneš the road-tax amounted
	<i>1½ GÍN KÙ.B. ik-šu-dí</i>	for me to 1½ shekel of silver.
	<i>1 GÍN a-na kà-ší-im</i>	1 shekel (of silver) for the
5	<i>i-na Kà-né-eš</i>	to the official in Kaneš.
	<i>áb-ri-ma 10 GÍN KÙ.B.</i>	Because I had to wait(?) I consumed
	<i>a-ku-ul 1 GÍN KÙ.B.</i>	10 shekels of silver. 1 shekel
	<i>a-na É wa-áb-re</i>	of silver for the inn
	<i>i-na Hu-ru-ma</i>	in Hurama,
10	<i>1 GÍN KÙ.B. i-na</i>	1 shekel of silver in
rev.	<i>Tí-mì-il₅-ki-a</i>	Timilkiya
	<i>a-na É wa-áb-ri</i>	for the inn,
	<i>2 GÍN KÙ.B. i-na</i>	2 shekels of silver in
	<i>Ha-hi-im a-na É wa-áb-ri</i>	Hahhum for the inn,
15	<i>1 GÍN KÙ.B. i-na</i>	1 shekel of silver in
	<i>Bu-ru-lim a-na</i>	Burullum for
	<i>É wa-áb-ri</i>	the inn.
	<i>10 GÍN KÙ.B. iš-tù</i>	10 shekels of silver from
	<i>Kà-né-eš a-di a-lim^{ki}</i>	Kaneš until the City
20	<i>a-na ú-ku-ul-tí-a</i>	I spent on
	<i>ag-mu-ur</i>	my food.

Notes

2. What exactly the “fee” during or for the trip from Wahššana to Kanesh was is unknown.

6. I do not know what *bar’āum* means. The verb could have the silver as object and the *kaššum* as *dativus commodi*, but it seems more likely that it was used independently and figures as explanation for the consumption of 10 shekels of silver in Kanesh. A meaning “to be delayed / to have to wait” could link the verb semantically with the verb *bitrû / šutabrû* “to last long”, of which CAD B 280.2 quotes one OA occurrence (CCT 3, 44a:18), to which we can now add POAT 8:47 (*iššēr ša panîtim tuštabriam*) and perhaps a Š-stem in Kt h/k 73 (*aššer ša GN ušabra’akim*). See Veenhof, *Lex.*, s.v. *barā’um*.

7-17. The payment of 1 shekel of silver to the inn in four towns probably was for one night; that of 2 shekels in Hahhum suggests a longer stay there. One wonders where and how the traveler spent the other nights during his trip.

15-20. The trip started in Wahššana and apparently ended in Assur (l. 19), which is only mentioned when the total costs for food are summarized. The only expense listed for the long last stage of the trip, after crossing the Euphrates near Hahhum, is a payment for the inn in Burullum (= Burallum in *149:10). This was an important road-station that occurs in several OA “itineraries”¹ and is also known from texts from

¹ In TC 3, 164 (Nashef 1987, no. 26): 4, in the sequence: Assur – Burallum – Eluhhut; VS 26, 148:17: Admû – Mardaman - – Habura – Burallum; in VS 26, 43:10’f., expenses of a caravan calculated from Razamā until Burallum and from Burallum until Kaneš. Kt n/k 931

Mari and Tell Leilan. It was located on the west Bank of the Tigris, east of Tell Leilan / Šubat-Enlil in the area where we also find Habura and Mardaman.²

149. Kt 92/k 103 (1-65-92)

Memorandum on travel expenses during a trip from (Assur via) Qaṭṭarā, Barullum, Birtu'um and after crossing the Euphrates via Timilkiya (in the plain of Elbistan) to Hurama and Luhusaddiya.

	<i>5 ma-na hu-ša-e</i>	5 minas of scrap (copper)
	<i>i-na kà-ší-im</i>	in the steppe
	<i>a-na ta-ší-a-tim</i>	for transport.
	<i>iš-tù Qá-ṭá-ra a-dí</i>	From Qaṭṭarā until
5	<i>Ha-mi-za-nim 1/3 ma-na</i>	Hamizānum 1/3 mina
	AN.NA <i>a-ta-ší-a-tim</i>	of tin for transport.
	ANŠE <i>uš-pá-il₅-ma</i>	I replaced a donkey and
	<i>1 ma-na 15 GÍN</i>	had to balance 1 mina and
	AN.NA <i>a-pu-ul</i>	15 shekels of tin.
10	<i>iš-tù Bu-ra-li-/im</i>	From Burallum
	<i>a-dí Bi-ir-tù-im</i>	until Birtu'um
rev.	<i>17 GÍN AN.NA a-na</i>	17 shekels of tin for
	<i>ta-ší-a-tim 7 GÍN</i>	transport. 7 shekels
	AN.NA <i>iš-tù a-al</i>	of tin from the Town
15	<i>Kà-ni-ší-e a-dí Tí-mì-il₅-ki-/a</i>	of the Kaneshites until Timilkiya
	<i>a-na ig-re e-re-qí-/im</i>	as hire for a wagon.
	<i>iš-tù Tí-mì-il-ki-a</i>	From Timilkiya
	<i>a-dí Hu-ur-ma a-na ig-/re</i>	until Hur(a)ma as hire
	ANŠE <i>2 GÍN KÙ 2 GÍN</i>	of a donkey I paid 2 shekels
20	AN.NA <i>áš-qúl</i>	of silver (and) 2 shekels of tin.
e.	<i>iš-tù Hu-ra-<ma> a-dí</i>	From Hura<ma> until
	<i>Lu-hu-sà-dí-a</i>	Luhusaddiya
l.e.	<i>3 GÍN KÙ 3 GÍN AN.NA</i>	3 shekels of silver (and) 3 shekels of tin
	<i>a-na ig-re ANŠE</i>	as hire of a donkey.

Notes

3, 6, 13. *Taššiātum*, “transport”, applies to additional costs, presumably for hiring porters and donkeys.

11. Birtu'um is not known from other sources

14f. The name “Town of the Kaneshites” suggests a settlement of people from Kanesh – Assyrian or rather traders based there, cf. the use of “Kaneshites” in Kt 92/k 313, quoted in *Geography* 45. Its position between Bura/ullum and Timilkiya suggests a location in the area where the Euphrates was crossed, usually connected with Hahhum, and this is supported by the sequence Burullum – Šimala - Hahhum in Kt g/k 199 (see below, Comment).

(AMMY 1992, 61f., no. 10):2ff. mentions a settlement of accounts in tin about expenses for a trip “from Ninua until Burallum” and in its final lines “from the City until Ninua”.

² The Mari text A 562 (see *Flor. mar.* 6 [2002] 269f.) documents that Šamši-Adad I travelled from Šu-bat-Enlil to Ekallātum via Burallum (where he stayed 5 days) and Tupham.

22. The journey ended in Luhusaddiya, from where one could travel more or less directly north, via the so-called “Narrow Track” that avoided Kanesh, or to the northwest, to Kanesh via Pınarbası.

Comment

The text lists small expenses – extra transport costs, hire of donkeys and once of a wagon – for a journey starting in Assur, through the steppe (*kašûm*), presumably along the upper course of the Wadi Tarthar, to the area east of the Jebel Sinjār, to arrive in Qaṭṭarā, to proceed via Hamizānum, Burullum, Birtu’um, the Town of the Kaneshites, Timilkiya and Hurama to Luhusaddiya. One may compare Kt g/k 199:8 (*Geography* note 248), which first lists the road-tax (*da’atum*) for a journey from Assur via Hamizānum and Šimala to Zalpa, followed at the end by some additional expenses, comparable to those mentioned in our text, during the same trip, where Assur, Burullum, Hahhum and Zalpa are mentioned. See the discussion in *Geography* 95-98.

Two closely related records of travel expenses

The following two records, already published in Veenhof 2008b as nos. 2 and 5, concern shipments of merchandise belonging to Šu-lštar and Iddin-Suen, who occur several times in records listing (shipments of) textiles (*316, *319, *317). In the account *320 Iddin-Suen is the owner of a shipment of nearly hundred textiles and the statement on how many of these were given as import-tax and pre-empted shows that they were imports that had arrived from Assur. The two records of travel expenses published here must refer to similar but bigger shipments, for the textiles mentioned in *320 imply a load with a value of only ca. 1 talent and 40 minas of tin. The lists of textiles, in which our two traders figure together with several others, indicate that these men had joined forces by entrusting their loads to a collective caravan (*ellutum*), whose leader upon arrival settled accounts with them for the costs of transport and clearance in the local palace on the basis of the “declared value” of their share in the shipment.

150. Kt 92/k 107 (1-69-92)

A memorandum on travel expenses, similar to *151, related to the value of a trader’s donkeys and their loads, presumably part of a larger caravan, referring to a journey, after crossing the Euphrates, via Timilkiya and Hurama to Kanesh.

per talent. |

Comment

The writer, leader of a caravan, paid in all 41 minas 15 shekels of tin (l. 4), obviously, as parallels show, for the ‘road-tax’ (*da’atum*) and in this case also for buying fodder. The statement in lines 22f. is surprising, because the tariff of lines 22-23, when applied to a load with a value of 8 talents 16½ minas of tin, yields only ca. 31⅓ minas, which is neither the figure of lines 4 - 41¼ minas - nor that of lines 19 - 34½ minas, the “loose tin” that the transporter had received. The difference could be explained by deducting from the figure of l. 4 the unknown cost of fodder that was included or by adding the additional expenses itemized in lines 6-15, due to the loss of a donkey (apparently repaired by hiring one for the final stages of the trip) which, together with the straw bought in Kanesh (for the donkeys?), amounted to 8 shekels of tin and 11¾ shekels of silver (equivalent to ca. 1½ minas of tin). This still does not explain the totals mentioned, but it is clear that the transporter – as happened frequently – had not enough “loose tin” available to meet all the costs and had to be reimbursed on the basis of this account for what he himself had advanced. The amount paid for the road-tax and for fodder according to lines 1-4 amounts to c. 8,6% of the value of the load, which compares well with that of *151, where it is c. 8,1 %, also “including the fodder”. These percentages are too high for a journey from the crossing of the Euphrates to Kanesh and must cover the whole trip from Assur,³ but they presumably were not specified for the first stage, because no specific, additional expenses were incurred.

151. Kt 92/k 108 (1-70-92)

A memorandum on expenses made during a trip very similar to that recorded in *150, but now the first stop is “the ‘Town of the Kaneshites’”. The speaker/writer probably is the leader of the caravan, who accounts for the payments he made “in the name of Šu-Ištar” (lines 19-20).

	<i>a-šu-mì : Šu-lštar</i>	for the sake
20	<i>ú-ša-qí-il₅</i>	of Šu-lštar.

Comment

The travel expenses charged by the anonymous writer to Šu-lštar for his share in the caravan were based on the “declared value” (*awītum*) of his donkeys and merchandise, rated in tin, whereby textiles and donkeys were both equated with 2 minas of tin (see most recently *OAI* 154ff.). The amount mentioned in line 1 suggests that Šu-lštar’s share consisted of three donkeys, two loaded with tin (with 8 textiles for wrapping) and one loaded with ca. 25 textiles. The costs charged to Šu-lštar (including the fodder for the donkeys, which is normally kept separate, see *148:18ff.) are ca. 8,1 % of the declared value, which is acceptable. The owner is separately charged a few smaller expenses, presumably because a donkey had died, which was replaced by hiring one (together with its driver) for a particular stage of the trip.

152. Kt 91/k 345 (1-202-91)

25	<i>ša 30 TÚG.HI.A</i> <i>iš-tù Ú-lá-ma</i>	for 30 textiles (transported) from Ulama
u.e.	<i>a-dí Bu-ru-uš-ha-/tim</i> <i>ù É wa-áb-ri</i>	until Burušhattum, and the cost of the caravanserai.

Notes

10-11 show that 40 minas of copper was equivalent to 26 shekels of silver, which means an exchange rate silver : copper of ca. 93:1. The “deduction” for Šu-Kubum amounted to 16¼ shekels, that “for me” to 9 3/4 shekels of silver.

17. Since the entries listed in lines 17-24 make a total of 34⅔ shekels of silver, “thereof” probably means from the original amount of 40 shekels mentioned in l. 3, but the background of these calculations remains unclear.

18. *té-pu-ul-šum*, as Kouwenberg observes, is a problem, not only because it should be *tāpul*, but also because the verb is normally construed with an accusative; a double scribal mistake?

19. A well-attested place-name, usually spelled Tumliya or Tumaliya (with its nisbe *Tumli'ium* or *Tumlum*; note *Tù-me^l(LÁ)-li-i-a-im*). *Geography* 234, note 886, locates it “in the area of Kaneš”, not far from this city and derives from our record that it was “on the road to Wahšušana”, unless “the unique spelling suggests ... a homonymous settlement”. This seems overly careful, considering that the comparable spelling *Tù-ma-li-a* (not yet mentioned by Barjamovic) also clearly refers to Tumliya as a source of grain

Comment

It is difficult to reconstruct the itinerary of a business trip from this record, in particular because of the sequence Tum(e)liya, Wahšušana, Ulama, Burušhattum, as also noted by *Geography* 334 (but I do not believe that Tumeliya is a mistake for Tuhpiya). The first mentioned sale of some textiles in Burušhattum could have taken place at the end of the trip and the mention of Kanesh in l. 12 probably refers to a later payment to settle accounts.

153. Kt 91/k 364 (1-221-91)

A memorandum on a variety of expenses incurred during a journey in the area within the bend of Kızılırmak, called Hattum by the Assyrians, mentioning the towns of Tawiniya and Tišmurna.

	<i>1½ GÍN ša da-at</i> <i>5 ni-a-tí ⅓ GÍN a-na NINDA</i> <i>i-na Ta-wi-ni-a</i> <i>2 ma-na URUDU i-na pá-tí</i>	1½ shekel for the road-tax of the five of us, ⅓ shekel for bread in Tawiniya. I gave 2 minas of copper
5	<i>ša Tí-iš-mur-na</i> <i>ik-lu-ú-ni-ma</i> <i>a-dí-in ⅓ GÍN 15 ŠE</i>	in the territory of Tišmurna where they held (us) back. 5/12 shekel of silver

VII. TRAVELING AND TRAVEL-EXPENSES

	KÙ.B. <i>ša</i> 1 UDU <i>ša a-na</i> <i>mu-ší : ni-il₅-qé-ú</i>	for one sheep that we acquired for the <i>mūšiu</i> -official,

15	<i>a-dí-šu-nu-tí</i> 1 GÍN KÙ.B. <i>a-na Ì.GIŠ</i> $\frac{1}{3}$ GÍN <i>ú-ku-ul-tí</i> ANŠE	I gave them sundries. 1 shekel of silver for oil $\frac{1}{3}$ shekel fodder for the donkey.

Notes

4. See for *pāṭu*, which might also be parsed as *battu*, *Geography*, footnote 871. Tišmurna is known as a centre of copper production.

10. Ladiya must be a woman because of line 13.

General comments

Texts 146-151 were first published in Veenhof 2006 and Veenhof 2008b, to which *145, *152 and *153 are added here, not because they would be related to the other texts - *147 may not even be from Elamma's archive and the excavations numbers of 148-151 suggest that they were stored together, presumably by the same person, - but to present all such "itineraries" together. The first three and the last two deal with journeys inside Anatolia and *148 and *149 also cover the journey through Northern Mesopotamia, *149 from Wahšušana via Kanesh to Assur, and *148 the other way around, from Assur to Luhusaddiya. *150 and *151 cover a trip that started after crossing the Euphrates (where he have to locate the "Town of the Kaneshites", see Veenhof 2006:22f.) and *152 and *153 deal with expenses during a trip in Anatolia. We do not know who traveled and wrote these memorandums (in the first person singular), hardly the same person in all cases (but see the note on *145:22). Some may have been written by Elamma or by one of his sons or servants, but 148-151, considering their excavation numbers, seem to belong to a file in which Enna-Suen, Šu-lštar and Iddin-Suen play a prominent role. *150 and *151 were probably written by the leader of a caravan who charged its participants specified, proportional shares in the expenses of the journey.

In Veenhof 2006 and 2008b I discussed the possible locations of the better-known towns and tried to reconstruct the routes followed. The data on Anatolia were taken up by Forlanini 2010:137-140 and I will not resume this discussion and refer the reader now to Barjamovic's *Geography*, to whom I had made the records available before their publication. I only mention here that Forlanini (p. 138, note 21) does not accept the equation of Tapaggaš with Tapigga = Mašat Höyük and so deprives us of a rare fixed point, but that Barjamovic maintains it (p. 258 note 987). Furthermore, that on 182 he makes the interesting suggestion that the "town of the Kaneshites" could have been "an idiosyncratic way of referring to the Assyrian settlement of traders at Hahhum, since it turns up in a position where one would have expected to find that city mentioned" - *q.e.d.*

Using such texts for geographical reconstructions, as pointed out in Veenhof 2006, repeated by Forlanini and amply documented by *Geography*, is difficult. They render account of expenses, so that places where nothing was paid are absent and they

also do not mention how many days a trip or its stages took. Uncertain is also whether the sequence of towns reflects a linear journey or includes smaller trips from a "central place" to smaller towns in their neighborhood for commercial purposes. This seems likely for the texts dealing with journeys in Anatolia, e.g. the return trip from Burušhattum to Ušb/pug/kattum in *145:11f., and for several small towns or villages visited according to *146 and *147. But some could be towns or villages along the caravan route, only mentioned when specific expenses were made there. The journeys recorded in *148 and *149, which ended in and started out from Assur, probably reflect linear caravan journeys, mentioning mostly well-known road stations on the caravan route (see for Hamizānum the note on *149:5). Birtu'um in *149:11 is thus far unique and was only mentioned because additional transport costs were paid for the trip from Burallum to this town. The trip of *153 was a short one by five persons in the north of Hattum, perhaps from Wahšušana, via Tawiniya and Tišmurna to Durhumit.

The terminology used for the expenses varies. Most frequent is "I gave", usually with the purpose (*ana*) of the payment (porters, personnel, inns, officials; an unknown "him" in *152:18-22), but we also have "I incurred" (*ikšudī* and *ikšudanni*), usually not specified (but in *147:24 said of the wages of the porters; note for the impersonal *ikšudam* in *149, AOATT 413ff.), and occasionally "I weighed out" (*151 passim), also in the D-stem (*145:4, and *151:5, 20). The first two texts also use "I spent / ... was spent" (*agmur*, *gamer*) and the noun *gamrum*, usually specified as "(for the journey) until GN". These are unspecified "travel expenses" (*gamrum ša harrānim*, see AOATT 248-53), which could include extra food, pasturing, additional transport costs (*taššiātum*), crossing a river (*146: 22), using a bridge (*147:10), etc. In addition there are payments of taxes, the *šaddu'utum* due to the colony in Burušhattum, paid in silver (*145:9-11), and the import-tax paid to local authorities, normally in towns with an Assyrian commercial presence: 6 shekels of tin on textiles in Hanaknak and 3 minas of refined copper for the *kaššum* in Durhumit (*146:10 and 24), 6 shekels of silver paid to, probably in Kuburnat (*147:34f.). *152:21-22 mentions "his road-tax" together with fodder for the donkey". The "gift" of 12 shekels of tin to the "commander" (*rabi sikkitim*) in Karahna (*147:19f.) may also have been a kind of transit-tax. Such payments were probably based on agreements with the local rulers whose towns were passed, whereby instead of a tax *in natura* (e.g. a piece of textile) also tin or silver could be paid.⁴ A regular feature are gifts to local chiefs and officials, such as the bead of tin for the *alahhinnum* (*146:20), but such persons are regularly designated by the generic term *kaššum*, "official, dignitary" (*146:19, 25), either because the writer did not know his title or considered it not important.⁵

It is interesting to note where silver, tin or copper was paid, because in different areas, depending on the composition and provenance of the caravan, different types of "money" were used. In *145 most payments were in copper, apart from that to the colony and the inn in Burušhattum. The caravan of *147 (arriving from the south) pays tin (presumably the "loose tin" taken along from Assur for expenses en route), also the small gift (12 shekels) to the commander in Karahna, but silver is used for the import-tax of l. 25 (in Kuburnat?). In *149:19 and 23, and *150:5-13 payments in

⁴ The 12 shekels of tin may be compared to the same amount the ruler of a small town would receive from each passing caravan coming from the south according to the treaty Kt n/k 794:19 (see *Studies Larsen*, 250 note 8).

⁵ See for this term OBO 160/5, 226f.; it was also used when the name of the week eponym was not (yet) known

VII. TRAVELING AND TRAVEL-EXPENSES

southern Anatolia were made not only in tin (with “tin for in the hand”), but also in silver, presumably because one wished to spend silver that was becoming “cheap” in Anatolia, while the exchange value of tin increased there, from ca. 1:15 in Assur to eventually ca. 1:6-8 in Anatolia. The beginning of *152 mentions the sale of a few textiles for silver, which was then used to buy copper, and all the following expenses are in silver. In *153, which records very small payments, some were in copper, but on various occasions one also paid very small amounts of silver (presumably also in line 1, as *da’atum*), while a servant received both some silver and some copper for his expenses (lines 11-13).

At times the size of the expenses may give a hint of the distance covered, e.g. in *145, where most expenses for the trips from town to town amounted to 3 minas of copper, but the short journey from Wahšušana to Tuhpiya required only 1 ½ mina of copper and the long one from Durhumit to Kanesh 5 minas. During the trip from Kanesh to Wahšušana also 3 minas of copper were spent, but here “small wares” (lines 28f.) too were used for paying. Occasionally porters were used, in *145 during the first two stages and in *147 to reach Šamuha and for the trip from Karahna to Kuburnat. Perhaps more difficult terrain was passed, a donkey had died or additional merchandise was transported. That donkeys were used is shown by the cost of *nabrītum* (*145:19), “stabling”, a place where donkeys could stay and graze (see *OAI*, 267f.). Payments to inns for accommodating persons and donkeys (lodging, food, water) are well documented (see *Geography* 34-37). Their use in towns with Assyrian trading stations (Burušhattum, Hurama, Šalatuwar, Wahšušana) may indicate that their premises did not offer visiting caravans sufficient facilities for passing the night and guarding the load, because they were not walled compounds or the caravans were too big. An inn offered both, cf. AKT 6, 560:22-24, “we gave 3 shekels of silver to the inn in Qaṭṭarā, where one guarded the goods” (*ana bēt ubri ša Q. ša unūtam iṣṣurūnī*).
